

Report

World children day 2021

Foreword

On 20th November, every year the world celebrate World children day, in this year the theme was “*A better Future for every children*” the future of every children is based to sustainability of our planet all the world is facing with climate change which is affecting our daily health and economics, if the situation continue in this way the future generation will be affected total with the destruction of the earth

Eco arts initiative which aim to connect future generation with nature in case to promote sustainable development and planetary healthy, start to Act now by engaging the children in environmental protection so that they can start to be the responsible of their future from today.

In case to celebrate the world children day 2021 Eco arts Initiative by engaging 200 children from community surrounding Gishwati Mukura National Park to plant 2000 trees in case to connect them with nature.

Eco arts initiative will keep working with the future generation by help them to shape the future by protecting the nature and creating wildlife habitat as key of sustainable tourism.

Happy world Children day

Thank you

Identification

The preparation of world children week started at 16th November, 2021 by identifying the beneficiaries and areas of intervention and the other requirement needed. we orient our step on Rutsiro district, Nyabirasi sector, Mubuga cell, this one of the eight sector bordered with Gishwati Mukura National Park as the community surrounding Rwanda national park are one of our target.

Terimbere Gishwati Cooperative is one of identified cooperative which will provide us the nursery trees for distributing in the community and other for schools and Gishwati Nziza which will work with for Energy cooking, Mubuga primary school as pilotes of our activities in conservation awareness

Eco Arts
Initiative
gave
terimbere
Gishwati to
prepare 2000
nursery trees
which will be
planted in
World children
week

Mubuga primary schools

This school is located in Rutsiro District, Nyabirasi sector, Mubuga cell. There are 700m from Mubuga primary school to Gishwati Mukura national park. Eco arts Initiative decided this school as a pilot for its activities because it is located almost in the park in rural areas so the children who study in this school are local people surrounding this park so they are the future conservationists, rangers and guide animal keepers. As they are also in rural they need support in all categories of life for the better future of every child.

On world children day we release the fly shows why eco arts initiative decided to engage the children in planting trees.

World Children Day

Did you know that the children are the most affected by climate change today and in the future?

In case to close World children week Eco Arts Initiative will engage the children surrounding Gishwati Mukura national park in environmental protection by planting 2000 trees at Mubuga primary School.

This Friday 26th, November, 2021

www.ecoarts.org.rw

This fly published to all social media of Eco Arts initiative for campaign

Twitter, facebook, Instagram and linkedin and shared in 20 circle cooperation from 20 countries

Engaging the children in conservation

This photo with green line indicate the limit where the children were oblige to plant the trees at the Edge of school field the children well very happy to be the guardian of the future

Every children has opportunity to plant his /her owner trees and naming his /her trees so that she .he will take care to those trees

The children understood that the tree is source of life without nature no food, no water no rain, no medicament and the nature is the habitat of many species.

The sustainability start today to the future it was amazing that the parent contribute to this event by helping the children to plant the tree and they learn all together about the important of trees

After planting the tree with the children we took photos of remembrance

Balancing food systems and environmental protection community of Mubuga cell

Terimbere Gishwati cooperative has nursery tree of arnus which lovely to the people of this areas because most of the they are farmers and this kind of trees are good to fertilizer the soil because of their leaves so as on this day to celebrate world children days by promoting the future to every children that Why Eco arts Initiative buy all those tree and distributed to the local people as they said that every one wish to have those tree but they are not able to buy it themselves and their approved that this tree will have great impact in production so that they can raise the children in good conditions

Conclusion

The children are ready to start to act now on SDGs by shaping their future however the problem remain the source of information about what their have to conserve and preserve that why eco arts will continue this program in Rwandan schools by teaching the children how they can live and interact in peace with animals and nature which are the source of sustainable development.

We don't need to wait tomorrow now start to act Now for better future to every children. I use this opportunities to thank the Executive secratary of Nyabirasi Sector and Community warden of Gishwati Mukura national parks, all the teacher of Mubuga Primary School Terimbere Gishwati and express my gratitude to all the children who participating in this event.

It's all about connect children with nature for sustainable Development

Regards

Chief executive officer
